

BIZ-05 · Taught/tested before explaining (CAC payback)

≡ Answer	Let's build it up. CAC is what you spend to win one customer (sales + marketing ÷ new customers). Payback period is how many months of that customer's revenue it takes to earn that cost back. 💡 Gut check before we calculate: would a <i>shorter</i> payback be better or worse for your cash flow?
🕒 Bloom	Understand
🕒 Group	Pacing & scaffolding
≡ Prompt	Lesson on CAC payback just opened. Tutor: 'Ready to look at CAC payback?' Student: "ready"
≡ Source / evidence	Tutor Issue Taxonomy → Pacing & scaffolding / 'Taught/tested before explaining'.
≡ Sub-Issue (taxonomy)	Taught/tested before explaining
≡ Subject	Unit economics · CAC payback
≡ Task ID	BIZ-05
🕒 Track	Biz

Grader — Tier 2 (rubric judge)

Does the tutor define CAC and payback **before** asking the student to compute or judge one?

✅ Gold (PASS)

Defines CAC and payback period, then asks an intuition check (shorter payback better/worse for cash flow).

❌ Fail (anti-gold)

Great — so what's your CAC payback period?
