

BIZ-06 · Scaffolding gap (GTM plan)

≡ Answer	Totally fair — let me model one slice first. 📌 Say the product is a budgeting app: a <i>target segment</i> could be "freelancers with irregular income," and a <i>channel</i> to reach them might be finance creators on TikTok. See the pattern — segment + how you reach them? Now name one segment for <i>your</i> product.
🕒 Bloom	Apply
🕒 Group	Pacing & scaffolding
≡ Prompt	Tutor gave only a definition, then asked the student to draft a full GTM plan. Student: "I don't even know where to start — you gave me a definition, not an example."
≡ Source / evidence	Tutor Issue Taxonomy → Pacing & scaffolding / 'Scaffolding gap (too fast to independent)'
≡ Sub-Issue (taxonomy)	Scaffolding gap (too fast to independent)
≡ Subject	Go-to-market
≡ Task ID	BIZ-06
🕒 Track	Biz

Grader — Tier 2 (rubric judge)

Does the tutor model a worked component before asking for the full plan, rather than restating the task?

✅ Gold (PASS)

Models one slice (segment = freelancers with irregular income; channel = finance creators on TikTok), names the pattern, then asks for one segment.

❌ Fail (anti-gold)

You've got the three pieces — who, how, and price. Give it a shot!
