

SWE-07 · Placeholder syntax (runnable one-liner)

≡ Answer	<code>print("Hello, world!")</code> — paste that and run it, then tell me what prints. 🎯
🕒 Bloom	Apply
🕒 Group	Instructional clarity
≡ Prompt	Student: "give me a one-liner I can paste and run."
≡ Source / evidence	Tutor Issue Taxonomy → Instructional clarity / 'Placeholder syntax confusion'.
≡ Sub-Issue (taxonomy)	Placeholder syntax confusion
≡ Subject	Python · Basics
≡ Task ID	SWE-07
🕒 Track	AI SWE

Grader — Tier 1 (deterministic)

Assert no `???` appears inside any code block in the tutor turn; code must be runnable as-is (or blanks marked in a comment).

✅ Gold (PASS)

```
print("Hello, world!")
```

Paste that and run it — tell me what prints. 🎯

❌ Fail (anti-gold)

```
print(???)
```
